

9522670

A large grid of yellow horizontal bars on a white background. The grid consists of approximately 100 columns and 100 rows. Each bar is a thin, solid yellow line segment. They are arranged in a regular pattern, with some bars being longer than others, creating a visual effect of varying lengths across the grid. The bars are positioned such that they overlap slightly or are adjacent in both horizontal and vertical directions.

The figure consists of a large, uniform grid of small, horizontal yellow rectangles. These rectangles are arranged in a regular pattern across the entire frame. The background is a solid black color, which provides a strong contrast to the yellow rectangles. The rectangles are thin and elongated, creating a sense of depth or perspective as they appear to recede into the distance. There is no text or other graphical elements present in the image.

A large grid of 1000x1000 cells, mostly white, with scattered yellow horizontal bars of varying lengths. The bars are distributed across the entire area, with some appearing in pairs or small groups. The lengths of the bars vary significantly, from very short segments to longer horizontal streaks.

A large grid of small squares, likely representing a digital image or a heatmap. A series of thin, horizontal yellow lines are drawn across the grid at regular intervals. The first yellow line is positioned near the top edge of the grid. Subsequent yellow lines are located approximately one-third of the way down from the top, two-thirds of the way down, and near the bottom edge. These lines appear to be spaced evenly apart vertically.
